

Scheduler API Documentation

Authentication

FAQ:

What is the Authentication scheme?

- Basic HTTP.

How can a new user be registered to use the API?

- **POST: /auth/user** can be used to create a new user where the username and password are passed in as JSON body parameters.

Does the API limit what a user can do?

- It does not. Any registered user can do whatever the API allows at will.

Author: Aman Singh

Create User

POST: /auth/user

Description

Create a new User to Authenticate into the API

Body Parameters

Field Name	Required	Type	Description
name	true	string	Unique username for a User.
password	true	string	Password for a User.

Body Example

```
{
  "name": "LazyPandas",
  "password": "LazyPandasSecurePassword"
}
```

Responses
